

# MORGANTOWN CONNECTOR PROJECT

## FACT SHEET:

### PROJECT OVERVIEW

Eastern Gas Transmission and Storage (EGTS), a BHE GT&S company, has proposed the Morgantown Connector Project to bring natural gas supply to a proposed combined cycle power plant in Monongalia County, West Virginia.

This site will power homes and businesses using natural gas from the Marcellus shale region - an abundant, reliable, and cleaner energy source.

The project will also provide natural gas supply to other locations in the vicinity of the power plant. This includes delivery points to a local distribution company (LDC) that will use this resource to heat homes, power businesses and support the vitality of communities.

The Morgantown Connector Project spans approximately 20 miles through Greene County, Pennsylvania and Monongalia County, West Virginia. It includes the installation of approximately 20 miles of 20" natural gas pipe and support structures to connect to the proposed power generation site in West Virginia. This site will generate 1,200 MW of power using natural gas.

See next page for map.

### PROPOSED PROJECT FACILITIES

- ✓ Approximately 20 miles of 20" pipeline installed from Greene County, PA, to a proposed combined cycle power plant in Monongalia County, WV.
- ✓ Receipt point at EGTS' Crayne Compressor Station, Franklin Township, Greene County, PA.
- ✓ Interconnect with third-party transmission pipeline in Greene County, PA. A measurement and regulation station may also be required.
- ✓ Measurement and regulation station at delivery to proposed combined cycle power plant in Monongalia County, WV.
- ✓ Interconnect with a local distribution company (LDC) with measurement and regulation station in Monongalia County, WV.
- ✓ Approximately 1 mile of 12" pipeline connecting the new 20" pipeline to the LDC interconnect.

### PROPOSED PROJECT SCHEDULE

#### Milestone

#### Target

Prefiling with FERC	August 2021
Open House	Fall 2021
File FERC Application	1 <sup>st</sup> Quarter 2022
Begin Construction	3 <sup>rd</sup> Quarter 2023
Project In-Service	3 <sup>rd</sup> Quarter 2024
