

EASTERN GAS TRANSMISSION AND STORAGE

ABOUT THE COMPANY

BHE GT&S, through its operating company Eastern Gas Transmission and Storage, LLC (EGTS), provides natural gas transportation and storage services. Operating nearly 4,000 miles of pipeline and more than 985,000 horsepower of compression, EGTS spans Maryland, New York, Ohio, Pennsylvania, Virginia and West Virginia, with its main office located in Bridgeport, West Virginia. The EGTS system links to other major pipeline markets in the Midwest, Mid-Atlantic and Northeast regions and provides reliable energy for a number of large customers, including utilities, power plants and local distribution companies.

With 17 underground storage fields and a total operating design capacity of 756 bcf—with 420 bcf working storage capacity—EGTS's underground natural gas storage system is the largest in the northeast and one of the largest in the United States. Storage assets are located in New York, Pennsylvania and West Virginia.

OPERATIONAL SAFETY

EGTS has been recognized for its exceptional safety record throughout its years of operation. In 2018, 2019 and 2020, the American Gas Association awarded EGTS with the Lowest DART Rate in Large Transmission, a key indicator of safety performance by OSHA. In 2021, EGTS also earned the Accident Prevention Certificates by achieving a DART- incident rate below the industry average for its company type.

The system is nationally regulated by the Federal Energy Regulatory Commission (FERC), the Pipeline Hazardous Material Safety Administration (PHMSA) and the Environmental Protection Agency (EPA), as well as a number of state agencies.

BY THE NUMBERS

- Approximately 4,000 miles of pipeline
- Ability to deliver 9.5 bcf/day
- Nearly 756 bcf of total operated design storage capacity and 420 bcf of working gas capacity
- 6 states of operation: Maryland, New York, Ohio, Pennsylvania, Virginia and West Virginia
- 93 compressor stations with more than 985,000 horsepower
- Bridgeport office is 1st privately owned LEED Gold Certified building in West Virginia, opened in 2016

MILESTONES IN EGTS HISTORY

1870

The companies that would become EGTS are born as a by-product of John D. Rockefeller's Standard Oil Company

1903

Standard Oil acquires Peoples Natural Gas and connects its lines to Hope Natural Gas

1943

Consolidated Natural Gas (CNG) spins off from Standard Oil as an independent company including Peoples Natural Gas, Hope Natural Gas, and three other gas companies

1979

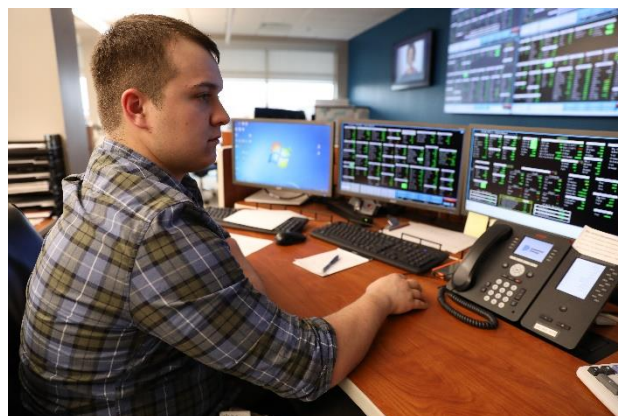

With 27 natural gas storage fields and 800 billion cubic feet of gas, CNG is the largest gas storage system in the world

2000

Dominion Energy merges with CNG

2020

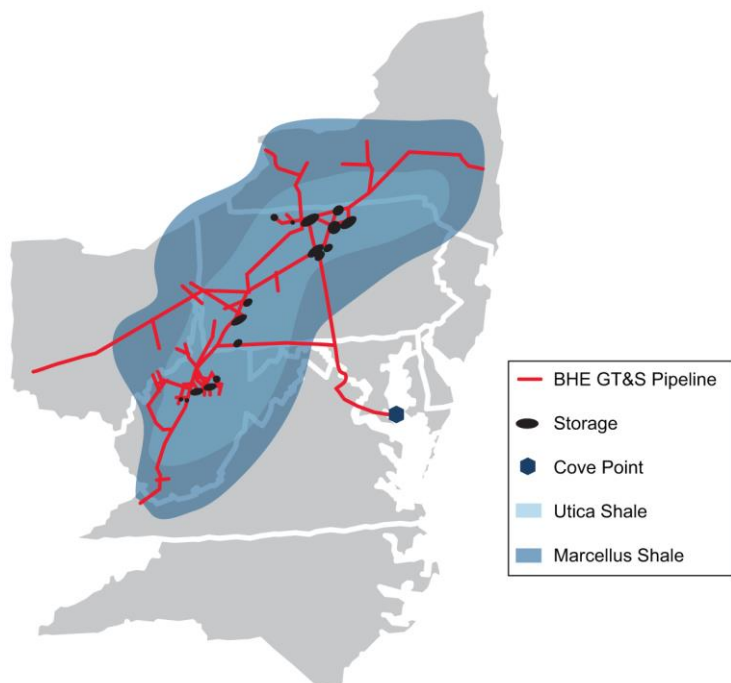

Berkshire Hathaway Energy acquires a number of Dominion Energy assets and the former CNG assets become EGTS, part of BHE GT&S

The gas control center in Bridgeport, West Virginia, monitors the EGTS system 24 hours a day, 365 days a year.
