

# CAROLINA GAS TRANSMISSION

## ABOUT THE COMPANY

BHE GT&S, through its operating company Carolina Gas Transmission, LLC (CGT), owns and operates an interstate natural gas pipeline company to provide safe, reliable and affordable natural gas transportation services to wholesale customers, such as power generators, large industrials, local distribution companies, municipalities, and energy marketers. CGT's nearly 1,500 miles of pipeline throughout South Carolina and a portion of southeast Georgia provide a critical infrastructure link between end users and wholesale supply.

Recently, CGT started providing access to renewable natural gas (RNG) via GreenGas USA. GreenGas USA develops RNG from agricultural waste, wastewater plants, and other sources such as dairy, hog, and chicken farms throughout the Carolinas. They can deliver RNG into the CGT system via the Georgetown injection point and it is available to any customer on CGT's system. As a result, end users can get the carbon credits necessary to become carbon neutral.

CGT is a transportation-only service provider, allowing customers to manage their commodity risk through the wholesale supply market. CGT's pipeline system is designed to serve Firm Transportation (FT) customers. FT service ensures pipeline capacity is available to transport customers' natural gas supply whenever it is needed, year-round.

## OPERATIONAL SAFETY

Over the years, CGT has received many awards for its outstanding safety record, a testament to CGT employees' dedication to keeping the community safe. The company had zero OSHA recordable medical events in 2019 and 2020 and zero OSHA DART (Days Away/Restricted Time) events in 2018, 2019 and 2020.

In 2021, CGT received the American Gas Association (AGA) safety award for employment and vehicular safety. The system is nationally regulated by the Federal Energy Regulatory Commission (FERC), the Pipeline Hazardous Material Safety Administration (PHMSA) and the Environmental Protection Agency (EPA), as well as a number of state agencies, including the South Carolina Department of Health and Environmental Control (SCDHEC).

Georgetown RNG Injection Point in Georgetown County, SC

## BY THE NUMBERS

- Approximately 70 percent of the natural gas consumed in South Carolina flows through CGT's pipeline system
- CGT owns and operates approximately 1,500 miles of natural gas transmission lines in South Carolina and northern Georgia
- There are seven supply interconnects, six compressor stations and 150+ delivery points across the CGT footprint

## CUSTOMER SERVICE

In 2022 Carolina Gas Transmission ranked 2nd amongst 38 other pipelines in the customer satisfaction category in a survey compiled by Mastio & Company.

## MILESTONES IN CGT HISTORY

**1952**

SCE&G forms South Carolina Natural Gas

**1984**

Merger with Carolina Energies to become SC Pipeline

**2006**

Converted to an interstate pipeline to become Carolina Gas Transmission

**2015**

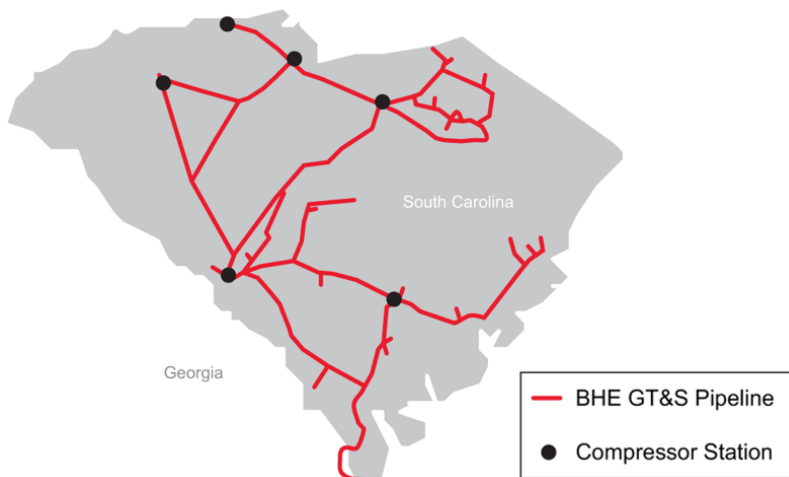

Became Dominion Energy Carolina Gas Transmission

**2020**

Following a Berkshire Hathaway Energy acquisition, became Carolina Gas Transmission, an operating company of BHE GT&S
