

CAPITAL AREA PROJECT

ABOUT EGTS

Eastern Gas Transmission and Storage (EGTS), a BHE GT&S company, provides safe, reliable and affordable natural gas transportation and storage services to markets in Maryland, New York, Ohio, Pennsylvania, Virginia and West Virginia. EGTS safely operates nearly 4,000 miles of pipeline and more than 985,000 horsepower of compression, offering one of the largest underground natural gas storage systems in the United States. It links to other major pipeline markets in the Midwest, Mid-Atlantic and Northeast regions, and provides reliable energy for a number of large customers, including utilities and power plants, as well as local distribution companies to heat homes and run small businesses.

PROJECT OVERVIEW

EGTS proposed the Capital Area Project (CAP) to meet the growing energy needs of customers in Maryland and Virginia. CAP leverages existing EGTS infrastructure while increasing the capacity on its PL-1 system through compression additions. This creates an incremental 67,500 dekatherms per day (dth/d) from receipt point Transco-Leidy in Clinton County, PA, for delivery to the Cove Point Pipeline at Loudoun County, VA. No new pipeline facilities are required for this project.

Regulatory approval for the project will be obtained through the Federal Energy Regulatory Commission (FERC) under a certificate of public convenience and necessity (CPCN), and air permits, as required, will be secured from state environmental agencies.

EGTS is committed to safety and environmental respect for the benefit of communities and its employees. EGTS operates with regulatory integrity with respect to local, state and federal laws. We are dedicated to the safety requirements for inspections, testing, operations, preventive maintenance, repairs, vigilant patrols of facilities and more.

See next page for a map outlining the project.

PROJECT DETAILS

Finnefrock Station

- ✓ Replace two gas coolers
- ✓ Auxiliary upgrades around the station

Centre Station

- ✓ Install one new approximately 6,100 horsepower (hp) turbine

Chambersburg Station

- ✓ Re-wheel existing units

Leesburg Station

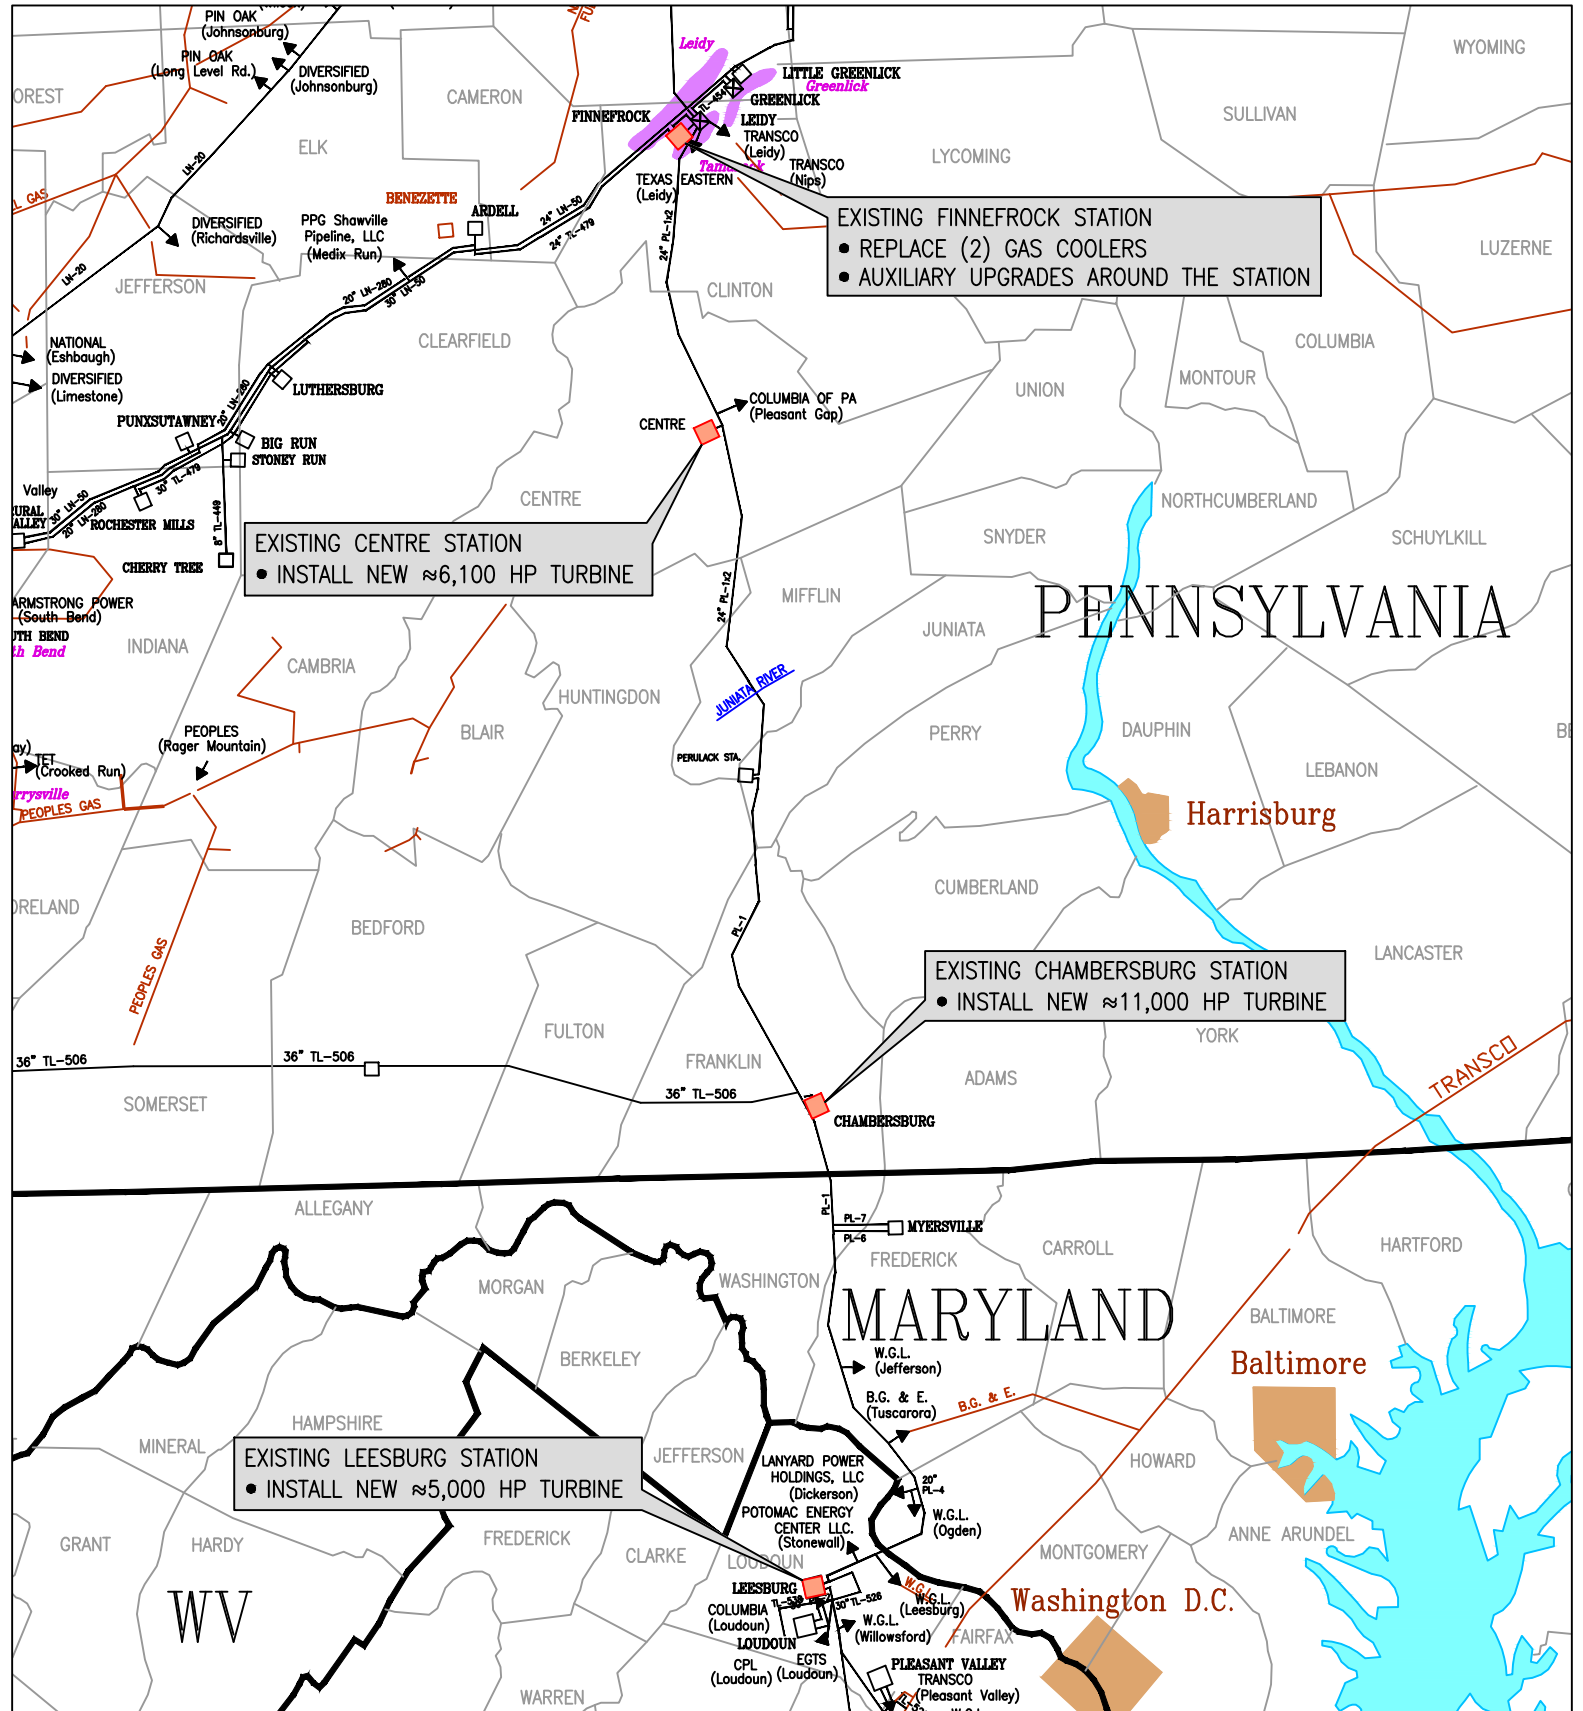

- ✓ Install one new approximately 5,000 hp turbine

PROPOSED SCHEDULE

Milestone

Target

| | |
|--|------------------------------|
| File FERC & Air Permit Applications | 4 th Quarter 2024 |
| Receive FERC CPCN | 1 st Quarter 2026 |
| Receive Air Permits, FERC NTP & Begin Construction | 2 nd Quarter 2026 |
| In-Service | 4 th Quarter 2027 |

EXISTING FINNEFROCK STATION

- REPLACE (2) GAS COOLERS
- AUXILIARY UPGRADES AROUND THE STATION

EXISTING CENTRE STATION

- INSTALL NEW $\approx 6,100$ HP TURBINE

EXISTING CHAMBERSBURG STATION

- INSTALL NEW $\approx 11,000$ HP TURBINE

EXISTING LEESBURG STATION

- INSTALL NEW $\approx 5,000$ HP TURBINE
